

ANDEROL B.V. is a manufacturer, marketer and supplier of innovative synthetic and non-synthetic lubrication solutions in selected markets, where we strive to be the vendor of choice.

To facilitate this ANDEROL is maintaining a quality management system per ISO 9001:2015. Using this system the company assures that it is compliant with applicable laws and regulations and that it aims to continuously improve product quality and customer satisfaction.

To the best of its abilities ANDEROL realizes this by:

- Monitoring and improving processes via internal audits;
- mapping out risks and opportunities and taking proper actions accordingly to make sure the organization is improving structurally;
- agreement on yearly quality objectives;
- actively asking for feedback from customers and using this as input for improvements.

Regarding the production of food-grade lubricants, ANDEROL is maintaining a management system per ISO 21469:2006. This standard describes hygiene requirements for lubricants which can be applied in machines that are used in the food industry and as such may incidentally come into contact with food.

Tom Kleinschmidt

Business Director ANDEROL B.V.
